

Simplicity 1-2-3

1

PREPARE...

- Save time compared with conventional floor stripper.
- Flexible application - either TASKI machine or mop & bucket.
- Strips all types of emulsion polish.
- Powerful, fast acting formula.
- Damp mop only - no need to rinse.

2

PROTECT...

- Long lasting high gloss finish for all floor types.
- Superior resistance to scuffs, marks and dirt, even in high traffic areas.
- Hard wearing finish reduces maintenance time.
- Unique triple polymer technology, outstanding wear and longer life.
- Extremely easy to apply with mop or applicator.
- Excellent adhesion to all floor types.

3

MAINTAIN...

- Suitable for mopping or spray cleaning applications.
- Repairs floor finish and restores initial gloss.
- Buffs to a high shine.
- Effectively removes a wide range of soilage.
- Suitable for use on all floors.

CAREFREE SPEED STRIPPER

No scrub, no rinse emulsion polish stripper.

CAREFREE STRIPPER

Floor polish stripper.

CAREFREE UNDERCOAT

Porous floor sealer to aid durability and gloss of your chosen polish.

CAREFREE ETERNUM

High gloss finish floor polish.

CAREFREE EMULSION

Medium gloss finish floor polish.

CAREFREE SATIN

Matt finish floor polish.

CAREFREE BUFFABLE

Buffable floor polish.

CAREFREE MOP & SHINE

Floor polish and maintainer all in one.

CAREFREE MAINTAINER

Cleans and helps maintain gloss finish on all floors.

CAREFREE GLOSS RESTORER

Restores gloss finish and provides protection of floor surfaces.

Your Questions Answered

If your CONCERN is...

...then ALWAYS...

...but NEVER

CHOICE OF STRIPPER	✔ Use CAREFREE SPEED STRIPPER in most cases, but carry out colour fastness test on linoleum floors	✘ Use CAREFREE SPEED STRIPPER on wood floors. The ideal product is CAREFREE STRIPPER
WHICH PAD TO USE	✔ Use correct pad colour: use the least aggressive pad to achieve the desired result	✘ Use black pad when stripping linoleum floors
WHAT DILUTION RATE	✔ Follow dilution rates on product label	✘ Use weaker dilution rate than recommended by manufacturer ✘ Use CAREFREE SPEED STRIPPER in hot water
CONTACT TIME	✔ Allow sufficient contact time for stripper to soften floor finish (typically between 5 & 10 mins)	✘ Allow stripper solution to dry out (apply more solution if necessary)
BUILD UP OF POLISH	✔ Agitate thoroughly with mop or machine. Use an edging tool	
STRIPPER RESIDUES	✔ Rinse porous floors well after stripping. Always rinse CAREFREE STRIPPER prior to application of polish or seal. Use appropriate TASKI vacumat	

POROUS OR WORN FLOOR	✔ Ensure floor is thoroughly dry after stripping ✔ Use CAREFREE UNDERCOAT to seal floor	✘ Apply seal to damp floor ✘ Apply seal to patchy/uneven floor - patches will still be evident when dry and may lead to poor adhesion
POOR GLOSS FINISH	✔ Apply a sufficient number of coats (2 minimum) ✔ Check the need to use CAREFREE UNDERCOAT on porous floors ✔ Use clean equipment to apply polish	✘ Leave alkaline residue following previous stripping ✘ Apply polish too thinly
FLOOR APPEARS SLIPPERY	✔ Remove outside influences (dust, oil, water, solvents)	
STREAKY, PATCHY FINISH	✔ Use clean applicator or mop to apply polish ✔ Apply subsequent coats in opposite directions to previous coats ✔ Allow 20 - 30 minutes between drying coats	✘ Apply finish too quickly, too frequently or too thick ✘ Return unused product to bottle
SLOW DRYING	✔ Adjust ventilation and/or room temperature and then check finish is dry by pressing a small square of tissue paper onto finish (when removed there should be no tackiness)	✘ Apply polish on dirty floor ✘ Force dry - allow time for film to cure
HINTS & TIPS TO APPLY FLOOR FINISH	✔ Leave a 15cm (6 inch) gap around edges on first coat	

POOR DURABILITY	✔ Reassess maintenance programme after review of traffic levels	✘ Use abrasive pads (darker than a blue pad) when spray cleaning
POOR CLEANING RESULT	✔ Check dilution rate is correct ✔ Damp mop frequently ✔ Dust control daily	✘ Use dirty mops, buckets or pads
