less is more

hand towel solutions

Katrin's concept for saving resources is called 'less is more'. It minimises paper consumption and hygiene risks thanks to high absorption capacity along with the right size sheet to do the job

▼ 46465 Katrin Centerfeed

Product code: 002.031
2ply White
20.5cm wide x 60m long
214 sheets
12 rolls per case

▲ 34455 Katrin Non Stop

Product code: 002.008
1ply White
23.5 x 24cm
14 x 250 sheets
3,500 per case

reduced paper consumption saves work, money and the environment and lower hygiene risks lead to better health

◀ 34401 Katrin One Stop

Product code: 002.006R
3ply White
23.5 x 34cm
21 x 90 sheets
1,890 per case

katrin zig zag, non stop and one stop hand towels

Katrin Zig Zag, Non Stop and One Stop Hand Towels are individually dispensed open and ready for use, unlike conventional C-fold which is often dispensed in clumps and presents closed. Katrin towels prevent unnecessary waste, controlling consumption and are labour saving. Impossible to touch more than one towel at a time, they are hygienic, minimise wastage and give maximum performance saving money and are kinder to the environment.

▲ 34300 Katrin Non Stop

Product code: 002.005
2ply White
23.5 x 24cm
15 x 150 sheets
2,250 per case

▲ 36180 Katrin Zig Zag

Product code: 002.004
2ply White
23.2 x 23cm
20 x 150 sheets
3,000 per case

using the right product for the right job cuts consumption, optimises efficiency, minimises wastage and gives maximum performance saving money and is kinder to the environment

environmental considerations

Metsa Tissue believes the planet should be cherished. environmental considerations feature at every stage of its production process and environmental good practice is an on going mission

illustrating
commitment to
the environment

illustrating
commitment
to quality

energy

Committed to reducing energy and using environmentally friendly alternatives. Metsa Tissue:

- maximise the use of non-fossil fuels which produce less carbon dioxide
- don't use "through-air-drying" technology in its production process as the process is deemed to use too much energy to meet swan label criteria

water

An important commodity in the production of tissue paper production. Metsa Tissue:

- use a close circuit water system to limit consumption and are leaders in the sustainable use of water resources
- rigorously clean, to remove harmful pollutants, water used in the production process

fibre

The main natural resource used in the production of tissue paper, fibre, is used in two forms by Metsa Tissue:

- recycled fibres wherever they provide adequate quality for the final product, with over 50% sourced close to the Metsa Tissue Mills
- virgin fibres supplied by sister company Metsa Botnia who lead the field in environmental good practice

air

Reducing air emissions associated with the production process through reducing energy consumption, Metsa Tissue:

- do not to use energy intensive production processes such as TAD and is striving to find less polluting technologies.
- invest in modern technology which uses wood based fuels and utilise the sludge waste to produce energy

packaging

Although it's necessary to package tissue products for hygiene reasons, Metsa Tissue:

- minimise its packaging with the help of a dedicated product development team
- use environmentally friendly recyclable packaging only from companies who meet certified environmental and quality standards

logistics

Transport is an unavoidable part of business so Metsa Tissue:

- implemented a policy that railways and waterways are used whenever possible for transport
- materials are sourced as close to the mill as possible and from ISO certified companies

less is more toilet tissue solutions

using the right product for the right job cuts consumption, optimises efficiency, minimises wastage and gives maximum performance saving money and kinder to the environment

bulk pack toilet tissue

Bulk Pack Toilet Tissue provides an individual dispensing top up system which prevents the need for the disposal of 'end rolls', controls pilferage, reduces overall usage and never run out resulting in cost savings and environmental benefits.

► **19502 Katrin Bulk Pack Toilet Tissue**

Product code: 001.008
2ply white
300 sheets
30 packs per case

Supported by Metsä Tissue

All data and information is for the sole purpose of giving a general informed purchasing choice and has been collated in partnership with a third party manufacturers, therefore Futures Supplies and Support Services Ltd does not control or endorse the contents in any way.

mini jumbo toilet tissue

Mini Jumbo Toilet Tissue rolls are equivalent to up to eight conventional toilet rolls, labour saving as they last much longer and need changing less frequently helping to minimise waste, labour and pilferage reducing usage resulting in cost savings and providing environmental benefits.

► **10610 Katrin Mini Jumbo Toilet Tissue**

12 rolls per case

system toilet tissue

System Toilet Tissue rolls are equivalent to up to 4 conventional toilet rolls, and have a paperflow breaking mechanism, labour saving as they last much longer and need changing less frequently helping to minimise waste, labour and pilferage reducing usage resulting in cost savings and providing environmental benefits.

► **15600 Katrin System**

Product code: 001.025
Toilet Tissue
2ply white
100m – 800 sheets
36 rolls per case

environmental labels

nordic swan

This is the world's first multi-national, eco-labelling scheme. The Nordic environmental label is a neutral, independent label which guarantees that the labelled products meet high environmental and quality standards. Only products which satisfy strict environmental requirements on the basis of objective assessments are allowed to display the environmental product label. www.svanen.nu/Eng/about

eu flower

A voluntary scheme designed to encourage businesses to market products and services that are kinder to the environment and for European consumers – including public and private purchasers – to easily identify them. You can find the Flower throughout the European Union as well as in Norway, Liechtenstein and Iceland. The European Eco-label is part of a broader strategy aimed at promoting sustainable consumption and production. www.eco-label.com

the forest stewardship council

The Forest Stewardship Council is an international non-profit organisation founded in 1993 to support environmentally appropriate, socially beneficial, and economically viable management of the world's forests. Public concern about the impacts of forest management has spurred a growing interest in forest product certification, and in turn has led to a proliferation of genuine independent timber certification programmes, and self-labelling initiatives www.fsc.org
