Microspeedy kit

A quick response flat mopping system perfect for multi-site mobilisations of contracts.

The Microspeedy kit is a professional complete flat mopping system which enables easier, faster and more effective cleaning, especially in high traffic environments where surfaces need to be cleaned and dried quickly.

It is designed to be used with our highly effective and easily fitted 40cm microfibre flat mop pads, which uses the minimum amount of water for fast drying, and doesn't need chemicals for excellent cleaning results.

The plastic break-frame mop head ensures easy fitting and removal of mop pad, and comes flagged in the four hygiene colours plus grey. The kit comes complete with lightweight colour-coded aluminium handle and the wheeled 20L Speedy mop bucket, a combination bucket and wringer with a built-in water divider for better hygiene.

Key features & benefits

Microfibre
Cleaning

Use damp
or dry

No chemicals
required

- Microfibre - attracts and holds dirt for effective cleaning.
- Fast - efficient wringer removes most of the water for quicker drying.
- Hygienic - colour coded flagged mop head for use in different areas.
- Safer - Speedy mop bucket has 'wet floor' graphics on two sides.

Washing instructions

Do not use fabric conditioner.

User instructions

The mop is most effective when damp - it is not used saturated with water like a conventional mop. This results in quicker drying and safer floors with minimum disruption to the cleaning area.

1. Break the frame with your foot.
2. Dip mop into clean water section of internal water divider and wring to remove excess water.
3. Apply the damp mop to floor and press down on the frame with handle.
4. After mopping dip into clean water, wring into dirty water and repeat mopping.
