

Cleaning collections by Robert Scott

Recommended kits for different cleaning requirements

Introduction

Our mission at Robert Scott is to make the world's workplaces easier to clean, and with that in mind we have created a range of collections based on the size and cleaning regimes of different environments.

For example, if you are a smaller business such as a café looking for a sustainable way to clean or medium sized dental practice with disposable procedures in place, then there's a kit for you. We think it makes the task of choosing the right product for the job much easier.

For a kit tailored to keep your workplace spotless and germ-free please get in touch with Robert Scott's Clean team on 01457 819400, email info@robert-scott.co.uk or at robert-scott.co.uk.

Sustainable cleaning collection for small areas (p5)

Washable cleaning collection for medium areas (p6)

Washable cleaning collection for medium to large areas (p7)

Sustainable cleaning collection for large areas (p8)

Disposable cleaning collection for small to medium areas

A collection of cleaning equipment for small to medium enterprises without laundry facilities or where it's necessary to dispose after use.

Categories:

- ✓ Small / medium areas
- ✓ Disposable
- ✓ Wet mopping

High Level Tool & Flexi Disposable Microfibre Sleeve 1

Bends into shape to clean the trickiest areas such as extractor fans, tops of units and backs of radiators.

Tool: 103368 | Sleeve: 104181

All-purpose wipes 2

This handy antibacterial roll in a dispenser contains 200 perforated wipes, ideal for single use on any surface to prevent cross-contamination.

100247

Big White RS1 Socket Mop 107g 3

A lightweight, super-absorbent mop made from non-woven fabric strips. A fast-drying and semi-disposable alternative to cotton mops.

102204

Hygiene Handle 4

An easy clean aluminium 137cm handle with T1 screw thread which can be used with mops, mop holders, washable brushware and squeegees.

103131

14L Double Bucket & Wringer 5

A two section bucket with eight and six litre compartments and a central wringer, designed to separate clean and dirty water for improved hygiene.

102950

Caution Wet Floor/Clean In Progress Wet Floor Sign 6

A great value double sided safety sign to warn against potential hazards from wet floor surfaces during and after cleaning or spillages.

101423

Washable cleaning collection for small to medium areas

A collection of cleaning equipment handpicked for small to medium enterprises with in-house washing facilities.

Categories:

- ✓ Small / medium areas
- ✓ Washable
- ✓ Microfibre

101228

Hanging Door Safety Sign & Door stop with handle 7

A closed sign to prevent unwanted entry and a doorstop for propping open doors.

Hanging sign: 101442 | Door stop: 101527

Cleaning tips

General cleaning advice for any environment.

High touch points

Think about germ hot spots and where people touch that might be out of sight, such as under table edges and chair arms.

Two stage cleaning and disinfecting

The best way to kill germs is to first clean away dirt and grime, then disinfect.

1. Spray

2. Wipe off

3. Spray, then leave for 5 mins.

4. Wipe off

How to use a microfibre cloth

Read below to learn how to clean quickly, effectively, with less water and without chemicals using modern microfibre cloths.

1. Fold in half

2. Fold again to make 8 sides, or again for smaller surfaces to 16 sides.

3. Using one side, place the cloth flat on the surface and apply pressure, then wipe to clean. Use a different side for each surface.

Why mop in a figure of 8

This helps you to keep track of where you've cleaned but also prevent cross-contamination by spreading dirt and germs.

Recommendations for surface cleaning

1. Clean from the cleanest area to dirtiest.

2. Clean from the top to the bottom so dirt and germs fall down.

3. To stop the spread of germs wipe in one direction.

The importance of colour coding

Based on industry best practice, many of our products are colour coded for use in designated areas. When ordering simply provide the product code and select your colour preference.

Blue: general lower risk areas (excluding food areas).

Green: general food and bar use.

Red: sanitary appliances and washrooms.

Yellow: washbasins and other washroom surfaces.
